EDUCATION

University of Maryland

Master of Science in Data Science

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Computer Science - AI - ML

College Park, MD, USA

Aug 2025 – May 2027

Delhi, India

Aug 2021 – Jun 2025

EXPERIENCE

GlobalFoundries

Austin, TX

AI Engineering Intern, HR Shared Services

Jun 2026 – Aug 2026

- Built OfferPilot AI, a multi-agent conversational system in Microsoft Copilot Studio with a parent orchestrator and **3** regional agents, automating compensation offer workflows for a global People Ops organization.
- Orchestrated Power Automate flows invoking Office Scripts against a live production Excel calculation engine to replace manual multi-source data retrieval, reducing active offer-construction time by **80–85%** per case.
- Integrated the Workday RaaS API through a scheduled Power Automate flow that fetched live HR compensation data at regular intervals, powering the recommendation agent's real-time data-retrieval layer end-to-end.

Caspex

Remote, India

Software Developer Intern

Oct 2023 – Mar 2024

- Deployed Flask APIs on AWS Lambda to support **12,000+** daily transactions with **99.9%** system uptime.
- Optimized automated data ingestion workflows using Python (Pandas, NumPy), developing custom connectors that accelerated time-series processing speeds and reduced log latency by **20%** for real-time equipment monitoring
- Orchestrated GitHub CI/CD pipelines to increase release frequency by **25%** and ensure strict version control.

Happiest Minds Technologies

Noida, India

Data Science Intern

Aug 2023 – Sep 2023

- Architected a 1D-Convolutional Neural Network (1D-CNN) for predictive maintenance of Metro Train Air Production Units, achieving **96.4%** fault prediction accuracy on unseen test sets for safety-critical railway systems.
- Processed 2 years of **5Hz** multivariate time-series data streaming from 15 analog and digital train sensors.
- Engineered an automated feature extraction pipeline utilizing Fast Fourier Transforms (FFT) and rolling statistical windows to capture complex time-series patterns, projecting a **25%** reduction in unplanned network downtime

TECHNICAL SKILLS

AI Agents, Automation & GenAI: Microsoft Copilot Studio, Power Automate, Office Scripts, Workday RaaS API, Multi-Agent Systems, Claude API, LlamaIndex, ChromaDB, RAG Pipelines, Semantic Search, Advanced Excel

Software Engineering & Systems: Python, TypeScript, Flask, AWS Lambda, GitHub Actions, CI/CD Pipeline Automation, RESTful APIs, Streamlit, Async/Concurrent Processing, Docker, Kubernetes

Machine Learning & Data Science: TensorFlow, Scikit-learn, Vision Transformers (ViT), 1D-CNN, FFT Signal Processing, Random Forest, NumPy, Pandas, YAML Config

PROJECTS

Threshold : AI Onboarding Document Generator | *Claude API, Python (Async), Streamlit* 2026

- Built an AI onboarding-packet generator running **5** concurrent Claude API calls to produce role- and site-specific compliance documents across **3** countries, compiled into a branded PDF in under **30** seconds.

Wren AI : RAG Chatbot for HR Policy Q&A | *LlamaIndex, ChromaDB, Claude* 2026

- Developed a RAG chatbot answering employee HR policy questions via LlamaIndex and ChromaDB, retrieving the **top-3** semantically relevant passages and citing exact source pages to ground every generated answer.

Semi-Supervised Pneumonia Detection via SimCLRv2 | *TensorFlow, ViT, Python* 2025-2026

- Architected a semi-supervised computer vision pipeline with DenseNet-169 and Vision Transformers, achieving **94%** anomaly classification accuracy on 9,243 images utilizing Feature Attention Networks and optimized loss

Predictive Maintenance ML — Air Compressor Fault Detection | *Scikit-learn, FFT, YAML* 2026

- Engineered a predictive maintenance pipeline for MetroPT3 IoT sensors, extracting 183 FFT spectral features from **1.5M+** points to train Random Forest classifiers, reducing unplanned downtime by **25%** via YAML-driven configs.
